

LexAlign Demo Guide

LexAlign PBC
3616 Far West Blvd, STE 117-425
Austin, TX 78731
lexalign.com

Purpose

The purpose of this document is to provide a demo guide to the sales team to help them learn how to demo the LexAlign solution.

Introduction (Start Demo)

After introductions and discovery discussion:

We're now going to look at the LexAlign solution starting with what you, as the Financial Institution have access to.

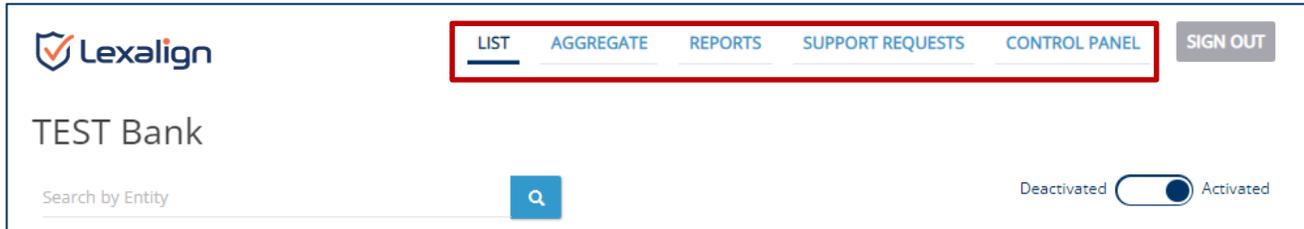

We'll then take a look at how your customers experience the LexAlign solution.

LexAlign Institution Dashboard

Log on to your demo account.

The data you are seeing is from a real LexAlign customer, but we've anonymized it to protect the innocent.

Let's start by reviewing the Dashboard navigation elements.

- The List Tab displays a list of customers, tracking high level status and results on a per customer basis.
- The Aggregate Tab provides a look across customers, summarizing common issues, trends, and completion status.
- The Reports Tab provides downloadable reports by completion status, risk factors, and customer actions.
- The Support Requests Tab shows the requests for support from customers.
- The Control Panel Tab enables configuration and set up; it is only visible for certain roles.

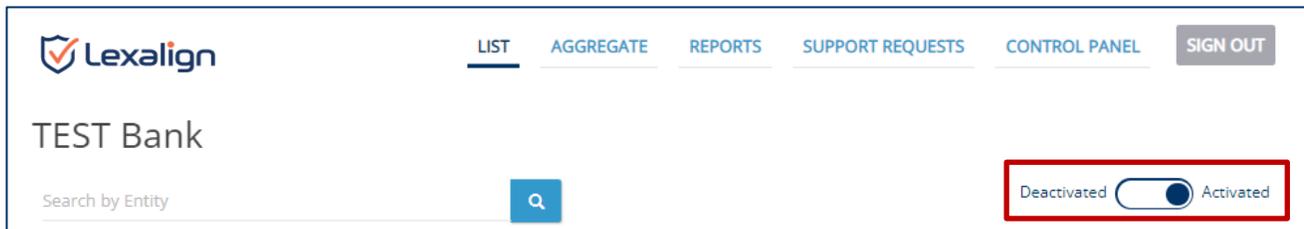

Now we'll drill-down into each of the sections.

LIST

The List section provides status by customer.

This list replaces and improves upon the spreadsheets you've been using, especially for the burdensome task of tracking completion status. With LexAlign, it is all automated.

You can filter the list by Activated or Deactivated accounts.

You can search by customer name.

The screenshot shows the Lexalign interface with the 'TEST Bank' header. A search bar labeled 'Search by Entity' is highlighted with a red box. To the right of the search bar is a magnifying glass icon. Further right is a toggle switch labeled 'Deactivated' and 'Activated', which is currently in the 'Activated' position. The top navigation bar includes 'LIST', 'AGGREGATE', 'REPORTS', 'SUPPORT REQUESTS', 'CONTROL PANEL', and 'SIGN OUT'.

And you can sort each of the columns.

This screenshot shows the Lexalign interface with the 'TEST Bank' header. A table of columns is highlighted with a red box. The columns are: Account (with a dropdown arrow), Email Status (with an upward arrow), IRR (with a dropdown arrow), Cohort (with an upward arrow), Diagnostic (with an upward arrow), DPD (with an upward arrow), Progress (with an upward arrow), Confidence Level (with an upward arrow), Last Completed (with a downward arrow), Compliance Essentials, LEXA Rating (with an upward arrow), Risk Factors (with an upward arrow), and Risk Alert (with an upward arrow). Below the columns, a row of data is visible for 'KB Timeshares LLC'.

Account	Email Status	IRR	Cohort	Diagnostic	DPD	Progress	Confidence Level	Last Completed	Compliance Essentials	LEXA Rating	Risk Factors	Risk Alert
KB Timeshares LLC	Pending	Moderate	1	Remote Deposit Capture	-360	100%	97%	10/28/22	Audit Report & Action Plan (11/1/22) Policy (10/28/22)	3	18	▲

Let's take a look at the data included in the List.

This screenshot shows the Lexalign interface with the 'TEST Bank' header. A table of data is highlighted with a red box. The table has the same columns as the previous screenshot. The data row is for 'KB Timeshares LLC'.

Account	Email Status	IRR	Cohort	Diagnostic	DPD	Progress	Confidence Level	Last Completed	Compliance Essentials	LEXA Rating	Risk Factors	Risk Alert
KB Timeshares LLC	Pending	Moderate	1	Remote Deposit Capture	-360	100%	97%	10/28/22	Audit Report & Action Plan (11/1/22) Policy (10/28/22)	3	18	▲

The **Account** column is a list of customers with a link to more detailed information about each customer's Assessments.

Email Status: The LexAlign platform automatically emails the customers to inform them of the expectations and deadlines for completing an Assessment. These email notifications are configurable. This column shows the status of those emails. A "Link Clicked" means the customer accessed their unique dashboard. It also indicates if an email address is missing or is bad (bounced).

IRR (Internal Risk Rating): You can add your Internal Risk Rating to the LexAlign dashboard if you have one. It is an optional field that can be included in your data import.

Cohort: Cohorts are groupings of customers. You can divide your customers into cohorts for launch management and reporting.

Diagnostic: Shows the LexAlign Diagnostic for which the row displays status data for the customer.

DPD (Days Past Due): Numbers in red show the number of days the customer is past due for completing an Assessment based on the due date assigned to them. Negative numbers indicate the number of days until the next Assessment is due.

Progress: Indicates the customer's progress in completing the current Assessment.

Confidence Level: This is one of the things that makes our automated approach superior and is intended to indicate the validity or reliability of the customer's self-assessment, as an additional risk factor. It is essentially a consistency calculation on the information collected in the Assessment. Lower confidence levels indicate inconsistent information was given during the Assessment, suggesting that some of the answers might not be reliable.

Last Completed: Indicates the date the last Assessment was completed.

Compliance Essentials: Shows the set of Compliance Essentials created by the LexAlign platform for the customer upon its completion of the Assessment. It also identifies whether and when a customer accessed a given Compliance Essential. And it is an indication for how engaged the customer is in taking the next steps after completing the Assessment. We've seen over 90% of customers open their Audit Report & Action Plan and 80% open their Policy document.

LEXA Rating: Proprietary risk rating based on LexAlign's unique data set captured by the Assessments. The LEXA Rating is derived by comparing the combined weight of Risk Factors identified in the Assessment with the maximum Risk Factor weight possible. The assignment of Risk Factor weights is based on the significance of a given Risk Factor in regulatory guidance or law, as adjusted based on input from experts and industry veterans, and as such are subject to change.

Risk Factors: Indicates the number of Risk Factors identified in the Assessment. A Risk Factor means the customer's practices represent an avoidable risk of fraud, data breach, theft, or loss based on the relevant Federal regulatory guidance.

Risk Alert: A Risk Alert indicates that there is a Risk Factor identified in the Assessment that either represents a heightened risk or is an issue that the Financial Institution can help remediate without delay. Rows with risk alerts are highlighted in yellow.

Now let's take a look at an individual customer.

Lexalign LIST AGGREGATE REPORTS SUPPORT REQUESTS CONTROL PANEL SIGN OUT

Snapshot

Account Name:	Abbott, Reinger and Haley	Institution Risk Rating: Low
Account Id:	7392	Diagnostics Activated: 1
Contact Email:	lexatest+975@chimi.co	Diagnostics Deactivated: 0
Contact Name:	Corrina West Jr.	Diagnostics Completed: 1
Company Name:	Abbott, Reinger and Haley	Diagnostics Past Due: 0
Address:	Lee Square Schmidt Crossroad Leslieton Pennsylvania 98404-1917	Risk Factors Identified: 21
		Risk Alerts: 5

Here you can see a summary of things like the number of Risk Factors and Risk Alerts from the current Assessment.

While scrolling through the page

The rest of the page provides results from completed Assessments and includes Confidence Level Score, Risk Factors identified, Risk Alerts indicated by the red triangles, the customer's Forward Projections, and other relevant information.

You can also see where the customer entered data directly where it says "customer input".

Forward projections can be helpful to determine if current behaviors such as a lot of overage spikes was expected or not, which can indicate a risk that needs to be attended to.

Notes can also be added for each Assessment to track interactions with the customer.

ADD NOTES REPORT

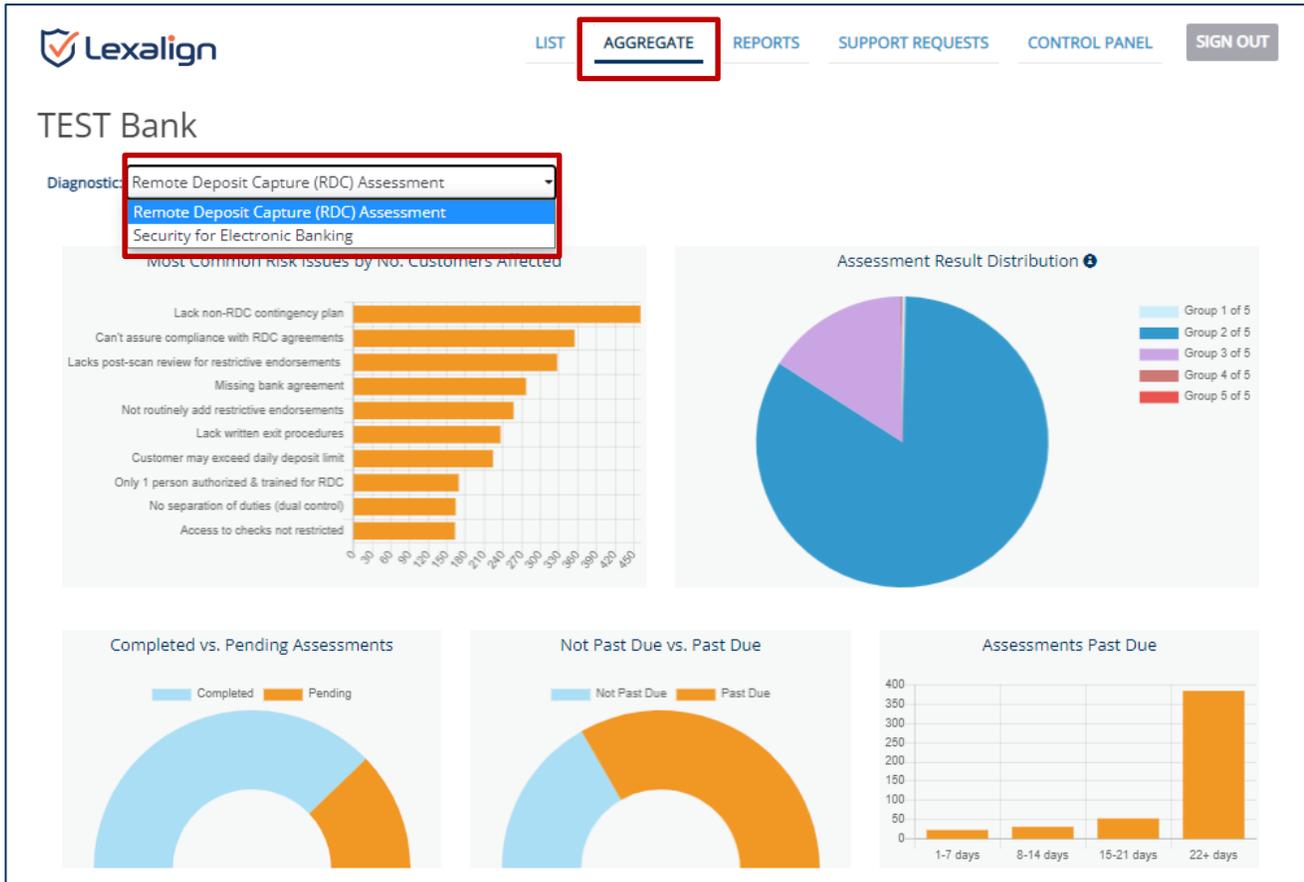

Now we'll look at the Aggregate section where we can see trends across all customers.

AGGREGATE

The Aggregate section demonstrates your Risk Management and Support.

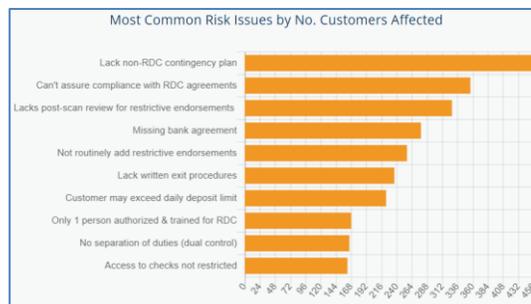

It can also help you prioritize remedial actions based on greatest potential impact.

The information is presented by LexAlign Diagnostic.

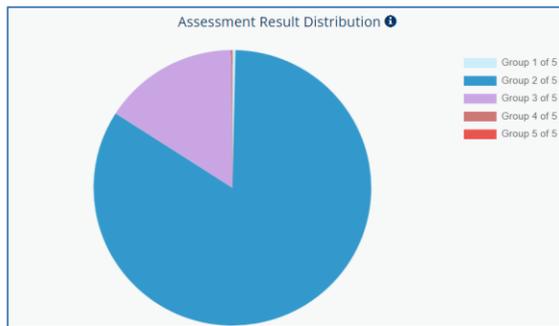

Let's take a look at each of the charts.

The **Most Common Risk Issues by Number of Customers Affected** chart shows the most common Risk Issues across customers' completed Assessments in the current cycle. This is the information you can use to prioritize remedial actions based on greatest potential impact.

The **Assessment Result Distribution** chart groups customers by weighted risk factors to give you a visual of how your customers are distributed by Risk Factors. In this example, the majority of customers are in group two which is a good indication of consistency across customers.

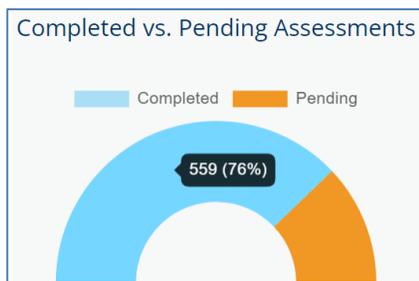

Optional: If anyone asks to explain how the Assessment Result Distribution is created.

For any given customer, the Assessment Result is derived by comparing the combined weight of Risk Factors identified in its Assessment with the maximum Risk Factor weight possible.

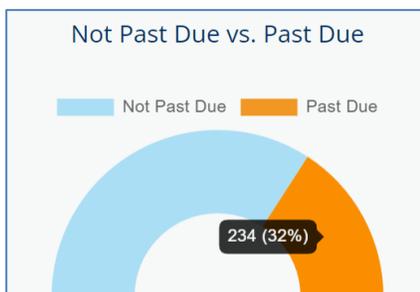

Group 1 has zero Risk Factor weight. Customers with greater than zero Risk Factor weight are placed in Groups 2 - 5, in ascending order.

Risk Factor weights are based on the significance of a given Risk Factor in regulatory guidance or law, as adjusted based on input from experts and industry veterans.

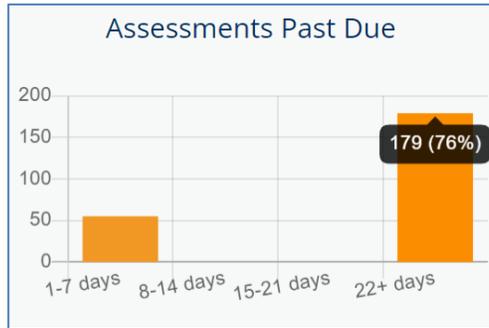

Completed vs. Pending Assessments shows how many customers completed an Assessment and how many still need to do them.

Not Past Due vs. Past Due shows how many customers are and are not past due on completing their Assessments.

Assessments Past Due shows the number and percentage of customers that are past due by the number of days past due.

REPORTS

The Reports section enables you to extract actionable data in a spreadsheet format.

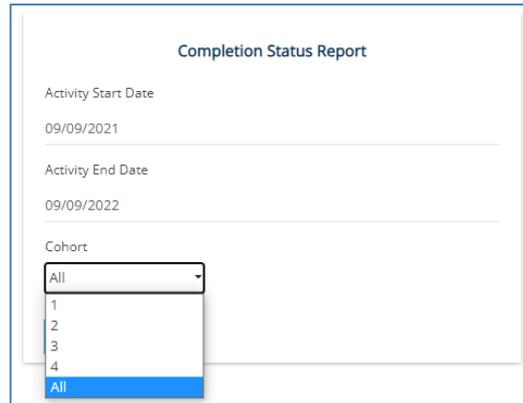

Actionable data includes Completion Status by customer, which customers are impacted by different Risk Factors, and which customers have or have not accessed each of the Compliance Essentials.

Also, we've included the related customer email address in each of the reports to help facilitate your Risk Management actions in case you want to email groups of customers.

The screenshot shows the Lexalign interface with the 'REPORTS' tab selected. Below the navigation bar, there are three report cards:

- Completion Status Report**: Activity Start Date (11/03/2022), Activity End Date (11/03/2022), Cohort (1), and a SUBMIT button.
- Risk Factors Report**: Assessments Completed After (11/03/2022), Assessments Completed Before (11/03/2022), Risk Factor Category (Device Integrity), and Cohort (1), and a SUBMIT button.
- Report on Compliance Essentials**: Start Date (11/03/2022), End Date (11/03/2022), Compliance Essential Type (Audit Report & Action Plan), and Cohort (1), and a SUBMIT button.

The **Completion Status Report** shows Assessment completion status by cohort and customer for the selected time period.

- Change the date to 2021
- Select "Device Functioning"
- Select "All Cohorts"
- Click "Submit"
- Open the excel file
- Expand the columns

This report shows the Device Functioning issues across the customers, note that the first 27 entries were all indicated by the customers and the responses are all very professional showing that they were taking the assessment seriously. This information is very actionable, and as email addresses are included in the file, you can do follow up to address the issues raised.

A	B	C
Risk Factor Category	Risk Factor	Detail
Device Functioning	Device operation risk	Device Issue (customer input): At times, scan doesnt note amount of check
Device Functioning	Device operation risk	Device Issue (customer input): Data extraction from image not always correct or is missing data
Device Functioning	Device operation risk	Device Issue (customer input): doensnt always read checks either hand written of computer checks
Device Functioning	Device operation risk	Device Issue (customer input): does not always read the numbers on bottom
Device Functioning	Device operation risk	Device Issue (customer input): ever since my computer updated to Windows 11 I cannot scan or make a deposit.
Device Functioning	Device operation risk	Device Issue (customer input): Feeder takes in 2 checks once in a while
Device Functioning	Device operation risk	Device Issue (customer input): I have to unplug the scanner for 30 seconds before I use it, otherwise it will not initialize.
Device Functioning	Device operation risk	Device Issue (customer input): It does not connect at times. I think it is the cables
Device Functioning	Device operation risk	Device Issue (customer input): It no longer separates problem checks from the whole
Device Functioning	Device operation risk	Device Issue (customer input): LOOSE PIECE INSIDE SCANNER
Device Functioning	Device operation risk	Device Issue (customer input): Needs replacement
Device Functioning	Device operation risk	Device Issue (customer input): Nothing comes out on the checks
Device Functioning	Device operation risk	Device Issue (customer input): Occasionally the scanner will not accurately read the check numbers i.e. Account Number (w
Device Functioning	Device operation risk	Device Issue (customer input): Often misses numbers - it is an OLD scanner.
Device Functioning	Device operation risk	Device Issue (customer input): Reports not printing correctly
Device Functioning	Device operation risk	Device Issue (customer input): Scanner doesn't read certain checks
Device Functioning	Device operation risk	Device Issue (customer input): scanner is fine
Device Functioning	Device operation risk	Device Issue (customer input): sometimes I have to manually enter info
Device Functioning	Device operation risk	Device Issue (customer input): Sometimes it does not connect and I have to restart the computer
Device Functioning	Device operation risk	Device Issue (customer input): Sometimes scanner won't wake up when computer is woken up and computer needs to be r
Device Functioning	Device operation risk	Device Issue (customer input): sometimes stops in the middle of scanning
Device Functioning	Device operation risk	Device Issue (customer input): SOMETIMES THE ROUTING #DOES NOT REGISTER
Device Functioning	Device operation risk	Device Issue (customer input): Sometimes, check information has to be entered manually
Device Functioning	Device operation risk	Device Issue (customer input): the scanner has trouble reading money orders
Device Functioning	Device operation risk	Device Issue (customer input): The scanner is not initializing and sparks when plugged in
Device Functioning	Device operation risk	Device Issue (customer input): The scanner misreads certain types of checks often and capture data must be corrected to ba
Device Functioning	Device operation risk	Device Issue (customer input): Web Scan sometimes stops working.
Device Functioning	Device operation risk	Device issue: At least one scanner not printing clearly
Device Functioning	Device operation risk	Device issue: At least one scanner not printing clearly
Device Functioning	Device operation risk	Device issue: At least one scanner not printing on checks
Device Functioning	Device operation risk	Device issue: At least one scanner not printing on checks
Device Functioning	Device operation risk	Device issue: At least one scanner not printing on checks
Device Functioning	Device operation risk	Device issue: At least one scanner not printing on checks
Device Functioning	Device operation risk	Device issue: At least one scanner not printing on checks
Device Functioning	Device operation risk	Device issue: Check feeder on at least one scanner not working
Device Functioning	Device operation risk	Device Issue: Check feeder on customer's sole scanner not working
Device Functioning	Device operation risk	Device Issue: Check feeder on customer's sole scanner not working
Device Functioning	Device operation risk	Device Issue: Check feeder on customer's sole scanner not working

The **Report on Compliance Essentials** shows the status by cohort and customer regarding access of Compliance Essentials.

Access of Compliance Essentials means customers have taken the first step in addressing their gaps and improving their risk status.

SUPPORT REQUESTS

The Support Requests section lists customer requests for support.

Across our clients, requests have been less than 1 per 100 customers so this does not create a burden for your team.

The screenshot shows the Lexalign interface for Turtle Creek Bank. The top navigation bar includes 'LIST', 'AGGREGATE', 'REPORTS', 'SUPPORT REQUESTS' (highlighted with a red box), 'CONTROL PANEL', and 'SIGN OUT'. Below the navigation, the page title is 'Turtle Creek Bank'. A table lists support requests with columns for Request, Email, Company, Date, Status, Subject, and Message. The first request is for 'becky@mybank.com' from 'Abbott, Reinger and Haley' on '10/7/22', with a status of 'Open' and subject 'New team member'. The message reads: 'We've had an addition to our team. Please add brenda@mybank.com to our LexAlign account.' Below the message, there is a text area for notes, a 'CONTACTED CUSTOMER' button, a 'SAVE NOTES' button, and a 'RESOLVED' button. The text 'Last updated by:' is visible at the bottom.

You can add notes to document the actions you take for each request and indicate customer outreach and status.

CONTROL PANEL

Note: we aren't covering all details of the Control Panel in the demo, that would be too much detail for a demo.

The Control Panel section enables authorized users at your institution to perform various set up and implementation functions.

The screenshot shows the Lexalign interface for TEST Bank. The top navigation bar includes 'LIST', 'AGGREGATE', 'REPORTS', 'SUPPORT REQUESTS', 'CONTROL PANEL' (highlighted with a red box), and 'SIGN OUT'. Below the navigation, the page title is 'TEST Bank'. The main content area is titled 'User Administration' and includes a sub-section 'User Admin' with tabs for 'Implementation', 'Customer Communications', and 'Customer Activations'. The 'User Administration' section contains the text: 'This part of the Control Panel is where you can:' followed by two bullet points: 'See the list of users that have access to the LexAlign solution.' and 'Add or edit users if you are authorized to do so.'

User Admin

User Admin enables the addition and removal of Institution users.

Institution users are assigned one or more roles.

The basic user is the Analyst Role.

Team members that are responsible for configuration using the Control Panel will be assigned the Diagnostic Admin role. The Diagnostic Admin role includes the Analyst role.

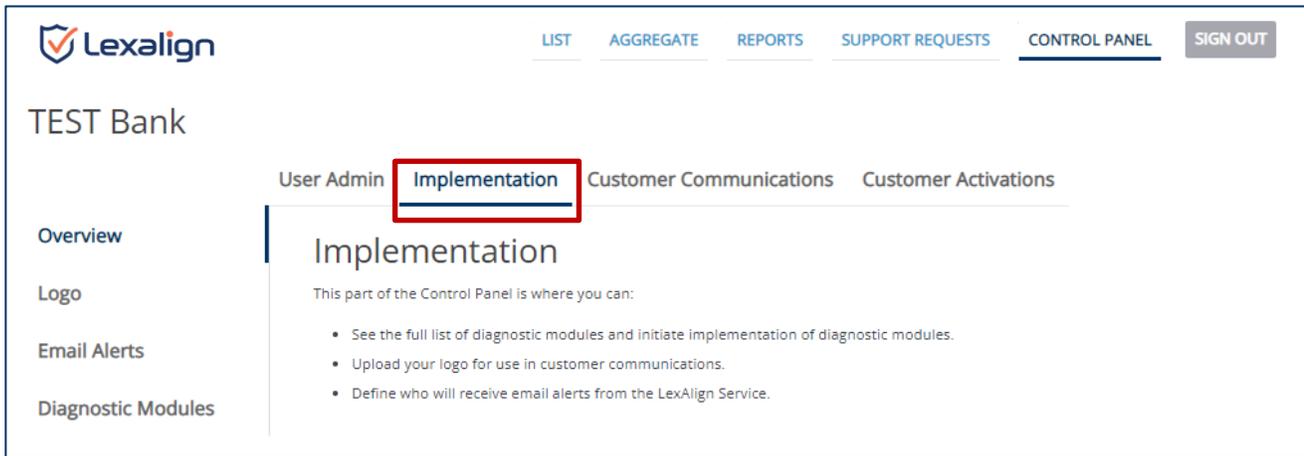

The Institution Admin role is used for IT resources at your institution that are responsible for giving employees access to software products. If an employee only has the Institution Admin role, they will only have access to the User Admin functions of the Control panel.

The screenshot displays the LexAlign interface. At the top, there is a navigation bar with links for LIST, AGGREGATE, REPORTS, SUPPORT REQUESTS, CONTROL PANEL (which is active), and SIGN OUT. Below this, the page title is 'TEST Bank'. A secondary navigation bar includes 'User Admin' (highlighted with a red box), 'Implementation', 'Customer Communications', and 'Customer Activations'. On the left sidebar, 'Overview' is selected, and 'Users' is highlighted with a red box. The main content area is titled 'Users of the LexAlign Service' and includes a note: 'Note: Only Authorized team member may add new users'. Below the note are input fields for 'First Name', 'Last Name', 'Email Address', and 'Select roles', followed by a 'SUBMIT' button. A table lists the current users:

Name	Email Address	Role(s)	Added	Actions
Kacy Howell	lexatest+2@chimi.co	<input type="checkbox"/> Diagnostic Admin <input type="checkbox"/> Institution Admin <input checked="" type="checkbox"/> Analyst	On 8/30/21 3:48PM	REMOVE
Joesph Ferry	lexatest+3@chimi.co	<input type="checkbox"/> Diagnostic Admin <input type="checkbox"/> Institution Admin <input checked="" type="checkbox"/> Analyst	On 9/6/21 5:01PM	REMOVE

Implementation

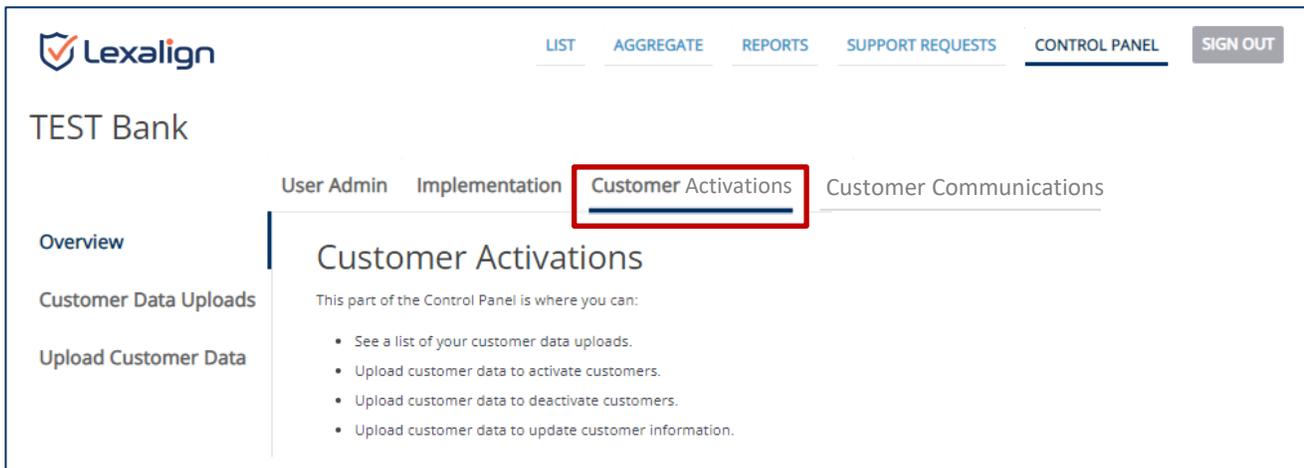

The Implementation section of the Control Panel enables you to upload your logo that is used in email communications and the Customer Dashboard, identify who will receive different system email alerts, and request implementation of new LexAlign Diagnostics.

The screenshot shows the LexAlign Control Panel interface. At the top, there is a navigation bar with the LexAlign logo on the left and several menu items: LIST, AGGREGATE, REPORTS, SUPPORT REQUESTS, CONTROL PANEL (which is underlined), and a SIGN OUT button. Below the navigation bar, the page title is "TEST Bank". On the left side, there is a sidebar menu with items: Overview, Logo, Email Alerts, and Diagnostic Modules. The main content area has a sub-navigation bar with "User Admin", "Implementation" (highlighted with a red box), "Customer Communications", and "Customer Activations". The "Implementation" section is active, showing the title "Implementation" and a sub-header "This part of the Control Panel is where you can:". Below this, there is a list of three bullet points: "See the full list of diagnostic modules and initiate implementation of diagnostic modules.", "Upload your logo for use in customer communications.", and "Define who will receive email alerts from the LexAlign Service."

Customer Activations

The Customer Activations section of the Control panel enables you to upload customer data to activate or deactivate customers for specific LexAlign Diagnostics.

The screenshot shows the LexAlign Control Panel interface. At the top, there is a navigation bar with the LexAlign logo on the left and several menu items: LIST, AGGREGATE, REPORTS, SUPPORT REQUESTS, CONTROL PANEL (which is underlined), and a SIGN OUT button. Below the navigation bar, the page title is "TEST Bank". On the left side, there is a sidebar menu with items: Overview, Customer Data Uploads, and Upload Customer Data. The main content area has a sub-navigation bar with "User Admin", "Implementation", "Customer Activations" (highlighted with a red box), and "Customer Communications". The "Customer Activations" section is active, showing the title "Customer Activations" and a sub-header "This part of the Control Panel is where you can:". Below this, there is a list of four bullet points: "See a list of your customer data uploads.", "Upload customer data to activate customers.", "Upload customer data to deactivate customers.", and "Upload customer data to update customer information."

Customer Communications

The Customer Communications section of the Control Panel enables you to configure your standard email footer, define the sub-domain to be used for your email communications, tailor the email templates used in the notification process, define the email schedule by cohort, access content for use in a Frequently Asked Questions (FAQ) landing page that will live on your web site, and provide the URL for the FAQ page so that it can be used in the email communications.

The screenshot shows the LexAlign Control Panel interface. At the top, there is a navigation bar with the LexAlign logo on the left and several menu items: LIST, AGGREGATE, REPORTS, SUPPORT REQUESTS, CONTROL PANEL (which is underlined), and SIGN OUT. Below the navigation bar, the page title is 'TEST Bank'. A secondary navigation bar contains 'User Admin', 'Implementation', 'Customer Activations', and 'Customer Communications' (which is highlighted with a red box). On the left side, there is a sidebar menu with the following items: Overview, Email Footer, Email Configuration, Email Templates, Email Schedule, FAQ Template, and FAQ URL. The main content area is titled 'Customer Communications' and contains the following text: 'This part of the Control Panel is where you configure email messages and an FAQ page to communicate with your customers about the LexAlign service.' Below this, it states: 'LexAlign standardizes and automates the otherwise laborious task of announcing the beginning of a new assessment cycle and notifying customers when their specific assessment is due. We also provide other useful guidance on the LexAlign account, diagnostics, and information products they'll receive.' It then says: 'In particular, this section allows you to:' followed by a bulleted list: '• See a list of users of the LexAlign Service.', '• Add or edit users (if you are authorized to do so).', '• Upload your logo for use in customer communications.', and '• See a list of users of the LexAlign Service.'

That's it for the Institution Dashboard demo, any questions about what I've shown you so far?

Now let's take a look at where all of the data comes from and how your customers experience the LexAlign solution.

LexAlign Customer Dashboard

The best way to show you what your customers will have access to is to show you a brief video demo as it would be too lengthy to go through an entire assessment. This will show you where the data comes from that we saw in your dashboard.

The video is x minutes long.

After the video demo we'll wrap up and discuss next steps.

PLAY VIDEO

After the video

Do you have any questions about what your customers would have access to?

That completes our demo of the LexAlign Solution.

Hopefully it gave you an idea of how the LexAlign Solution enables substantial improvements in back office operations, customer compliance monitoring and support, customer experience, and ultimately your back office efficiency ratio.

Next Steps

Cover standard next steps that are part of your sales process.
