

## LexAlign

**RDC Risk Management** 

### **Minimizing the Treasury Support Burden**

- Every Treasury Management professional understands that your RDC clients are key to your financial institution's commercial portfolio success.
- Weighing risk without overburdening customers or your Treasury Management team is a challenge for many financial institutions — that's why we created LexAlign.
- With LexAlign there are:
  - no more manual client questionnaires to email and collect,
  - no more data entry taking up all your time,
  - no more spreadsheets to be updated or corrected,
  - no more reports to generate, and most importantly,
  - no more taking time away from building relationships with your customers.
- Instead, the LexAlign system automates the process and seamlessly tracks activity for both you and your clients. Plus, your customers access the system when it's convenient for them and obtain essential, actionable guidance. And you get relevant information instantly via your secure, online dashboard.

Maximize customer compliance monitoring and support,

Minimize the time you spend on it, and

Improve the customer experience.

Learn how LexAlign revolutionizes Remote Deposit Capture risk management.

- Your RDC clients are key to your financial institution's commercial portfolio success.
- It's a modern convenience your customers expect.
- But as you know ...

It's almost impossible to manage the risk of Remote Deposit Capture while lowering your back-office efficiency ratio.

- Massive Risk: 3 out of 4 businesses reported actual or attempted check fraud in 2020. (JPMorgan AFP 2020 Payments Fraud Survey)
- Ineffective, Burdensome Risk Management:
  - Your treasury staff likely uses manual form questionnaires and spreadsheets to gather and review relevant data on compliance and security risk.
  - Regulators and auditors expect you to have that information.
  - But it's a <u>huge burden</u> with <u>no obvious</u> <u>benefit</u> to customers, and
  - It's <u>simply impossible</u> to assess <u>every</u> customer using current methods.
  - Not to mention that skilled treasury talent is proving more and more difficult to attract.
- As a result, risk overwhelms growth: Your staff is preoccupied with risk and compliance, not growing treasury.

#### That's why we created LexAlign

- LexAlign automates compliance audit and support so that RDC risk management is proactive, targeted, efficient, and routine, and your staff can focus on growth not compliance.
- Your customers receive:
  - A better experience: a dynamic and intuitive online self-assessment, that incorporates best practices and regulatory guidance.
  - Instant access to audit reports, action plans and policies – the foundational information for sound risk management.
- Your financial institution receives:
  - Risk ratings and actionable data on customer operational risk.
  - Actionable reports that filter and group customers by audit status and relevant risk factors.
  - Customer-specific data and aggregate trend analysis that clearly demonstrate robust risk management with minimal staff involvement.
  - A meaningful customer experience that shows that you care for their business safety and continuity.
  - Up to 90% savings on risk management.
  - The ability to grow your customer base and increase your institution's footprint.
  - And, not least, evidentiary records that could shift the cost of loss to your customers.

### LexAlign – RDC Risk Management – Minimizing the Burden

"I would recommend LexAlign to any financial institution looking to reduce the burden of compliance monitoring and/or improve their RDC risk management."

> Corrine Kison, FVP Treasury Management, Provident Bank

# What your peers say about LexAlign's RDC Risk management solution

- "LexAlign has helped us ease the burden of our Remote Deposit Capture risk management.
- "Previously, monitoring customer adherence to their responsibilities related to a high-risk service like RDC was extremely difficult and laborious.
- "Audit tracking and data consolidation were incredibly time consuming, and it was hard to access actionable data.
- "LexAlign automates these essential risk management functions, while also educating our customers on their responsibilities, and providing them with actionable insight on their operational gaps and remedial guidance.
- "LexAlign is the future of RDC compliance, security monitoring and data management."
